

Medics on the Scene!

THE SWINGING BRIDGE Active & Healthy Living

The Adventure :

Cub Scouts to the rescue! Each Lair will create a first aid situation for the other Lairs. Use props and make-up, if you wish, to make it look close to real.

When you create your scenario, talk about signs and symptoms the other Cubs can look for when they attempt a rescue.

Online Resources :

- Outdoor Adventure Skills
- First Aider Badge
- Boy Scout Treehouse Save

Safety note:

Make sure everyone keeps in mind at all times that your scenario is a simulated accident. No scenario needs to have any real element of danger to it.

Plan:

- What scenario will you create for the other Lairs?
- What will the signs and symptoms be for your scenario?
- When and where will you have this Adventure?
- What gear do you need?
- How will you practise first aid skills to prepare for this Adventure?

Do:

- Practise your first aid skills.
- Test the other Lairs with your scenario.
- Step up to perform an inspiring rescue at another Lair's challenge.

Review:

- What do you know now that you did not know before?
- How did your Lair work as a team to create a scenario?
- How did your Lair work as a team to perform a rescue?
- Who took charge of the scene?
- What would you do differently next time?
